

CREATE FLASK PROJECT

The screenshot shows the Visual Studio Code interface. The Explorer pane on the left shows a project named 'FLASK' with a file 'app.py'. The main editor window displays the code for 'app.py':

```
1 from flask import Flask
2 app = Flask(__name__)
3 @app.route('/')
4 def hello_world():
5     return 'Hello World'
6 if __name__ == '__main__':
7     app.run()
```

The Terminal pane at the bottom shows the command prompt output:

```
PS C:\Users\T Shalini\Desktop\flask> & "C:/Users/T Shalini/AppData/Local/Programs/Python/Python310/python.exe" "C:/Users/T Shalini/Desktop/flask/app.py"
* Serving flask app 'app'
* Debug mode: off
WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.
* Running on http://127.0.0.1:5000
Press CTRL+C to quit
```
